

Malta National Workshop at Nature Trust Malta

16th May 2016

Running Projects

Environmental Portfolio for Quality in University Education (EPOQUE)

Programme: ERASMUS +
Contract No: 014-1-EL-01-KA200-001373

EPOQUE aims to develop a common set of courses to enhance environmental awareness and sustainable energy consumption focusing at three levels of intervention, namely the modernisation of HE curricula, the incorporation of aspects related to the labour market and the active involvement of a variety of target groups and stakeholders

Natural Heritage Malta (NHM)

Programme: Internal R&D
Contract No: Collaboration with NatureTrust and Birdlife

Natural Heritage Malta (NHM) is a pilot project aimed towards preserving and providing access to digitised books or journal content specifically related to the natural heritage of the Maltese archipelago. The immense volume of published literature on the natural heritage of the islands is impressive but has limited distribution, and is mostly restricted to those few who can gain direct access to hard copy library or private collections.

Museum e-Systems (MUSES)

Programme: Internal R&D
Contract No: Collaboration with Seasus

To efficiently transform the organized media objects deposited in the digital archive into educational experiences, there is a need of a novel content management framework for organizing digital collections and for quickly selecting, integrating, and composing objects from the collection to produce exhibitions of different presentation styles. The long-term goal here is to design and build data organization, accessing, and presentation systems for vast amounts of heterogeneous hypermedia documents in a DM.

Energy Efficiency Knowledge Transfer Framework for Building Retrofitting in the Mediterranean Area (eeWiSE)

Programme: NMP-ENV-ENERGY-ICT
Contract No: FP7 - 314347

ee-WiSE will promote the EE Market focusing on building retrofitting in the Mediterranean. In short, the reason of the project answers three key questions: why retrofitting, why the Mediterranean, and why now. ee-WiSE will assist the transformation of the EE Market and promote the transfer of good practices. It will also achieve coordination between the Mediterranean and the EU, and knowledge transfer activities will expand the Market through dissemination of energy efficiency solutions. This project will finally guide new business models

Subject: EPOQUE project and eLearning Platform

Dear colleagues,

I'm writing to you regarding the EPOQUE project (Environmental Portfolio for Quality in University Education) which has been developing a set of university courses focusing on environmental issues and schools. We have now completed the training framework and course materials, also thanks to the support from various local stakeholders. The course units developed are the following:

- Participatory methods in sustainable management of natural resources;
- Current state and future of the Mediterranean and Baltic Area in an interdisciplinary perspective;
- Entrepreneurship-Intelligent energy;
- Applied Energy management systems in/for schools.

We would like to give you and your staff an overview of the final project deliverables and teaching material which can be found on the EPOQUE website www.epoque-project.eu
The EPOQUE e-Learning Platform has also been launched recently and is accessible via <http://www.epoque-platform.eu/>

Please do not hesitate to contact us should you need any further information

Thank you for your attention.

Regards,

1
